Waterproof material

Suitable for smartphones, tablets & iPad

MIIA BLUETOOTH KEYBOARD USER MANUAL

Read and retains instruction

1. Content

1. Bluetooth keyboard
2. Instruction manual
3. USB Charging cable

2. Product Features

1. Broadcom 20730 chipset, Bluetooth 3.0 interface.
2. Industry leading Bluetooth solutions, WIDCOMM BTW (Microsoft officially designated software) Bluetooth software.
3. Built-in power management software.
4. Mute design suitable to be used in environment with other people, it does not disturb even who's sleeping; comfortable handling feel, foldable and easy to carry.
5. Support iOS, Android and Windows system.

3. Specifications

1. Executive standard: Bluetooth V3.0
2. Maximum operating distance: 10 meters
3. Modulation mode: 2.4 G straight sequence fh (FHSS)
4. Transmit power: Class 2 levels
5. Working voltage: 3.7V
6. Working current: 1.5 mA
7. Standby current: 1.0 mA
8. Sleeping current: 40 uA
9. Charging current: 150 mA
10. Standby time: 150 days
11. Theoretical use time: 45 days (average 2 hours every day)
12. Continued usage time: 110 hours
13. Theoretical charging time: 1-1.5 hours
14. Lithium battery capacity: 170 mAh (included)
15. The lithium battery type: 302530
16. The key dynamics: 60 + 10g
17. Buttons life: 5 million times
18. Operation temperature: 0-55 °C
19. Storage temperature: -10-60 °C

4. Pairing Procedures

We the manufacturers, Future Graphics SPA, hereby declare that the product Miia AU-KBBT meets the requirements of the R&TTE Directive (EC). The complete Declaration of Conformity is available from the company: Futura Grafica S.p.A., Via Domenico Fontana, 12 - 00185 Rome

CE

INFORMATION FOR USERS
Pursuant to Legislative Decree no. 49 of 14 March 2014 "Attuazione della Direttiva 2012/19/UE sui rifiuti di apparecchiature elettriche ed elettroniche (RAEE)"
The symbol of the crossed out wheeled bin on the equipment indicates that the product must be collected separately from other waste at the end of its useful life. Therefore, the user must turn in the equipment, complete with all its essential components, at the end of its useful lifetime to an appropriate centre for separate collection of electrical and electronic waste. The user may also take to the retailer at the time new equipment of an equivalent type is purchased, trading one item for one item, or one item for zero items for devices measuring less than 25 cm on the longest side. Suitable separate collection for ensuring that the equipment is recycled, handled and disposed of compatibly with environmental obligations prevents possible negative effects on the environment and human health. It also favours the recycling of the materials that the device is made of. Improper disposal of the product by the user implies the application of administrative penalties as per D. Lgs n. Legislative Decree no. 49 of 14 March 2014

The product works with batteries covered by European directive 2006/66/CE, which may not be disposed of with normal household waste.
Inquire about local regulations relating to the separate collection of batteries: proper disposal prevents negative consequences for the environment and health.
